Hi Hiring Manager

My name is Alex Tran. I am a recently graduated student from CSU-Fullerton. I am majoring in Computer Science, Web Development.

I am interested in an opening position for Entry-Level Web Application Developer. I know that you are looking for someone located in Omaha. While I am from California, I don't mind relocating to Omaha. I understand that I am just a graduate student with not much experience, but I can guarantee that my skills are proficient, and I can accomplish a given task in a timely manner. If you hire me, I guarantee I will do the best of my ability to help the company grow.

I have great knowledge with HTML, CSS, Bootstrap, PHP, Json, SQL languages, Javascript. Besides, I am also proficient in Reactjs Hooks with Restful API and I am able to construct backends with Express Nodejs and Python Flask API Architecture.

I am driven to become a full stack developer. I hope there will be an opportunity to speak with you about this position.

Sincerely

Alex Tran
